Office Action Summary	Application No. 10/724,079	Applicant(s) HEESEMAN, JURGEN	
	Examiner Hadi Shakeri	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Applicant's election without traverse of claims 1-10 and 13-15 in the reply filed on March 08, 2006 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 9, 10, are rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al. (6,910,955).

Wang et al. discloses all of the limitations of claims 1 and 9, i.e., an abrading machine comprising a floating bearing arrangement coupling a drive shaft to the frame including rolling contact bearings, a common shell and a drive shaft. Wherein the drive device drives the shell in rotating manner; the rolling contact is a linear shaft capable of moving in a reciprocating manner e.g., due to thermal expansion.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3723

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al.

Wang meets all of the limitations of the above claims, except for the pressure elements supported by two drive shafts, an eccentric shaft or belt drive with tensioner. All of which considered as modification obvious to one of ordinary skill in the art, i.e.; two drive shafts for table (10) in adapting the apparatus for a larger effective area and since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8; eccentric shaft for adapting the tool for orbital motion; and a tensioner for the embodiments utilizing belt drives.

Allowable Subject Matter

6. Claims 3-5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the elements/structures and structural relationships as recited in claim 3, and 4 (claim 2 plus the spring).

Conclusion

8. Prior art made of record and not relied upon at this time, are considered pertinent to applicant's disclosure. Ling et al., Takahashi et al., Anderson, Hoglund are cited to show related inventions.
